

# OASIS "70 Plus" Wood Fiber Blend Mulch™

*Where Your Environment & Your Budget Agree!!*

## MOISTURE ABSORBENT MATERIAL

**Oasis "70 Plus" Wood Fiber Blend Mulch™** is a professional hydro-seeding product, which forms a moisture absorbent protective mat to promote seed germination and plant growth. The material is fiberized, screened and packaged in a 50-pound non-slip, tough, weather resistant, 4mil polyethylene bag.

**Oasis "70 Plus" Wood Fiber Blend Mulch™** is produced from 100% Virgin Wood Chips combining 70% Virgin Wood Chips with Post-Consumer Recycled Cellulose Fiber. This combination is free of weed seed and contains no growth inhabiting factors. These organic fibers are hollow and quickly disperse with water, seed, and fertilizer to form homogenous slurry that ensures a uniformly distributed strand of grass.

## PROVIDES PROTECTION

When sprayed, **Oasis "70 Plus" Wood Fiber Blend Mulch™** fibers interlock with the soil surface to form a strong moisture absorbent, indurative mulch mat. This mat provides a favorable seed germination and plant growth environment while providing protection of the seedbed from the harmful eroding effects of wind and water. Its uniform quality helps prevent clogging in hydraulic mulching equipment and the **dissolvable green dye packet** provides a visual gauge of application coverage and an immediate "landscaped" appearance.

## STRAW / HAY TACKING

In certain applications, applying **Oasis "70 Plus" Wood Fiber Blend Mulch™** with **Oasis Tackifier™**, will reduce the need of straw or hay. If combing a mulch/hay tackifier matrix, then use 750lbs. of mulch per acre.

### Physical Properties

Moisture Content	12% +/- 3%
Organic Content	1.6% (max)
Water Absorption	7x Fiber Weight
Biodegradable	100%
Application Rate	1,500-2,000 lbs. Per Acre
Color	Premium Green
Bag Weight	50 lbs.
Package	4 mil Polyethylene Bag

# OASIS "70 PLUS"™ MEETS OR EXCEEDS YOUR REQUIREMENTS FOR WOOD BLEND FIBER MULCH

Oasis "70 Plus" Wood Fiber Blend Mulch™ can be applied separately or after adding seed and fertilizer products to product's mixing rate. Follow equipment manufacturer's installation instructions and recommendations.

Recommended Application Rates*		
Slope Gradient	US	Metric
Moderate	1,500 lbs. / Acre	1,700 kg / Ha
4:1 to 3:1	2,000 lbs. / Acre	2,300 kg Ha

Oasis Tackifier™ can be added as an excellent binder with extra soil stabilization along with dust and odor control.

Oasis "70 Plus" Wood Fiber Blend Mulch™ is advanced technology that is manufactured from recycled cellulose fiber and virgin wood chips. It has outstanding protection and water holding performance where needed. Provided cover, increasing seed germination and establishes vegetation, non-toxic and is 100% biodegradable.

- Rapid dispersion fast mixing in jet-agitated and mechanically-agitated hydro seeding equipment.
- Easy application and smooth shooting, high coverage slurry.
- Resists rainfall impact to stay in place longer (for increased protection, add Oasis Tackifier™)
- For increased slope conditions, application can be increased to 2500 to 3000 lbs. per acre mixing Oasis Tackifier™ at (1) five gallon pail per 1000 lbs.

\*\*Enhance erosion control by adding Oasis Tackifier™--\*\*Environmentally Friendly

\*\*Field Proven by Professional--\*\*Expanded Surface Coverage--

## PACKAGING AND SHIPPING

40 Each/50 Pound Bags per Pallet
